DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Saito et al.(JP 2001-143512.)

Saito discloses a light guide plate provided with an incidence side end face, a distal side face located oppositely to the incidence side end face, an emission face outputting light inputted from said incidence side end face and a back face located oppositely to the emission face, allowing the light inputted from said incidence side end face to be outputted from said emission face during traveling; at least a part of said emission face providing an emission promotion surface which has a plurality of first slopes and a plurality of second slopes; said first slopes being arranged repeatedly at intervals along a direction from said incidence side end face towards said distal side face; said second slopes being arranged as to fill up the intervals respectively; each of said first slopes being inclined as to have a normal leaning to the distal side face; each of said second slopes being inclined as to have a normal leaning to the incidence side end face and to be steeper than adjacent first slopes on both sides thereof.(fig 2)

Allowable Subject Matter

3. Claims 4-12 are allowed.

4. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
